ALI HAIDER

WordPress Frontend Developer Intern | HTML5, CSS3, JavaScript, Responsive Design

Lahore, Pakistan | haiderali380717@gmail.com | 0300-0380717

SUMMARY

Computer Science graduate (2026) with hands-on experience in HTML5, CSS3, and JavaScript, and in building responsive, user-friendly websites and web applications with React.js and Next.js. Experienced in deploying live websites, debugging frontend issues, and using Git/GitHub. Detail-oriented with good problem-solving skills, and eager to learn WordPress, Elementor, and Gutenberg and to turn Figma/PSD designs into working pages.

WHY I'M A GOOD FIT

- Builds responsive interfaces that work across mobile, tablet, and desktop using HTML, CSS, and JavaScript.
- Has deployed live websites (Vercel and VPS) and understands the basics of website deployment and maintenance.
- Comfortable finding and fixing frontend bugs, and paying attention to small design and layout details.
- Quick learner, ready to pick up WordPress themes, plugins, Elementor, and Gutenberg on the job.

SKILLS

- **Frontend:** HTML5, CSS3 (custom CSS), JavaScript (ES6+), TypeScript, Responsive Web Design
- **Frameworks:** React.js, Next.js
- **Backend & Databases:** Node.js, Express.js, REST APIs, MySQL, MongoDB
- **Tools & Deployment:** Git, GitHub, Vercel deployment, VPS deployment
- **Learning:** WordPress, Elementor, Gutenberg, Figma/PSD to WordPress, basic SEO and speed optimization — eager to learn
- **Soft Skills:** Attention to Detail, Problem-Solving, Communication, Team Collaboration, Willingness to Learn

PROJECT EXPERIENCE

UniFinder — University Hub Portal (Final Year Project) — *React.js, Node.js, Express.js, MongoDB*
Oct 2025 – May 2026

- Built a full-stack, responsive web platform covering student, course, and campus management.
- Collaborated across frontend and backend, writing clean code and debugging issues across the stack.

AI Lead Enrichment Pipeline with CI/CD (Live on VPS) — *Next.js, GitHub Actions, Vercel*

- Built and deployed a live Next.js application to Vercel and a production VPS with automated deployment.

Conversational Research Agent with Live Tools (Live) — *Next.js, TypeScript, Supabase*

- Built a responsive, interactive UI with streamed answers and per-session saved data.

Document Q&A System with Citations (Live) — *Next.js, Supabase pgvector*

- Built a document upload and search app with a clean, user-friendly frontend.

EDUCATION

Bachelor of Computer Science — University of Management and Technology | CGPA: 3.38

CORE STRENGTHS

HTML5 • CSS3 • JavaScript • Responsive Design • Frontend Debugging • Attention to Detail • Problem Solving • Fast Learner
